## EXPERIENCE

### University of the Philippines Los Baños - Intern

- Assisted in updating and maintaining records using the University's User Monitoring System to support efficient data management.
- Designs and create publication materials for events and programs.
- Assisted on Digitizing and organizing special collections and local resources.
- Supported inventory tasks by tracking and organizing materials using a customized system.

## PROJECTS

### PWDIS - Persons with Disability Information System and Accessibility Mapping

Full Stack Dev

- Designed and developed a progressive web app(PWA) information system and accessibility mapping that utilizes Geographic Information System(GIS) as well as Data Analytics to assist PWDs in identifying accessible locations as well as providing them access on inclusive information and resources.
- Technologies Used: PHP, MySQL, HTML, CSS, Bootstrap, JavaScript, Google Maps JavaScript API, Google Places API (new), and Charts.js.

### Digitalphotography Online Booking System

Full Stack Dev

- Developed a comprehensive and user-friendly online platform to streamline the scheduling of photography sessions. The system enabled clients to seamlessly book sessions through an intuitive interface, ensuring a smooth and hassle-free experience. Integrated robust booking management features, including availability updates, real-time chatbot and a calendar synchronization function to prevent scheduling conflicts.
- Technologies Used: PHP, MySQL, HTML, SCSS, Bootstrap 5, JQuery, VanillaJS.
